Capability Statement

FROGMORE TECHNOLOGY SOLUTIONS

CEO: Norman Capers
Mobile: (540) 466-2549
Email: norman.capers@frogmoretech.com

Core Competencies:

Through our extensive competencies, capabilities, and committed team, we stand ready to enhance and fortify the IT framework of our clients, so their technological operations are efficient, secure, and aligned with their strategic objectives. Our team brings forward a comprehensive suite of services underpinned by our core competencies, which are:

- **AWS Systems Operations & System Administration:** Specialized ability in the operational management of Amazon Web Services and IT systems at large.
- **Operating Systems & System Engineering**: Expertise in deployment and management of Microsoft-based corporate infrastructure.
- **Client Consulting:** Personalized consultancy services for IT solutions and strategies.
- **Local and Wide Area Network & Network Architecture:** Proficiency in the planning, implementation, and maintenance of network solutions.
- **Web Technologies & Network Engineering:** Specialization in emerging web platform development and network engineering solutions
- **IT Project Management:** Veteran leadership in managing and executing IT projects with precision.
- **Technical Troubleshooting:** Excellence in diagnosing and resolving complex IT problems.

Differentiators:

In a landscape where precision, reliability, and expertise are not just preferred but essential, our brand offers unparalleled value through our deep-rooted commitment to excellence in technical support, complex IT operations, and strategic project management. With 25 years of hands-on experience cultivated within the demanding environments of the United States Marine Corps and the Intelligence Community, we stand uniquely equipped to address the intricate requirements of government agencies.

Our expertise is not just in managing technology but in fostering robust enterprise-wide systems and networks that government agencies can depend upon without reservation. This dedication to excellence and an unwavering focus on reliability and security make us the ideal partner for agencies looking to elevate their IT capabilities in service to national security and operational efficiency.

Past Performance:

National Geospatial-Intelligence Agency via Gridiron IT, current subcontractor of Gridiron IT. This project is centered around taking a proactive and leadership stance in enhancing the efficiency, security, and overall performance of critical systems used within government operations. The project's scope includes a comprehensive strategy to troubleshoot, recommend, and implement necessary configuration changes, deploy updates, and ensure the system's security and operational integrity.
